1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 23, 2006 has been entered. Applicant's After-Final Amendment of 11-27-2006 has been fully and carefully considered and deemed allowable over the prior art. Applicant's after-final amendments are entered.

2. The following is an examiner's statement of reasons for allowance: The invention relates to a process of converting a loop reactor into multiple loop reactors which retrofits and existing loop reactor comprising at least eight vertical legs; at least two non-vertical conversion runs, each non-vertical run connected in fluid communication with two vertical legs; at least two feed inlets; and at least two continuous discharge conduits; disconnecting at least one connection of each conversion run; and reconnecting each conversion run in fluid communication with a different vertical leg in such a manner to form multiple loop reactors each having at least one feed inlet and at least one continuous discharge conduit. The retrofitted loop reactor results in a different flow pattern from the prior art's multi-loop reactors in that the products from the downstream reactor are returned to the upstream loop. The prior art fails to teach and/or suggest re-configuring, retrofitting, re-working, or converting a single loop reactor into a multiple connected closed loop reactors as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
